### Monitoring Requirements Not Met for Palmerton Municipal Authority

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2022 we did not receive tests from our contracted lab and therefore cannot be sure of the quality of our drinking water during that time.*

#### What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for these contaminants \_\_\_\_\_ and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Asbestos	9 Years	3	1/1/2020-12/31/2022	7/2023
Nitrate/Nitrite	Annual	2	1/2022	6/2023
VOC's	3 Years	1	1/1/2022-12/31/2022	6/2023
Lead/Copper	3 Years	20	6/1/2022-9/30/2022	6/2023
TTHM/HAA5	Annual	2	8/9/2022-8/15/2022	8/9/2023

#### What happened? What was done?

Staffing and communication issues with contracted lab. We are keeping a closer eye on the lab to ensure testing is done at the correct intervals.
